

Voltage Coffee Supply Installation Agreement & Checklist

WATER PLUMBING:

- Dedicated cold water line with shut-off and 3/8" compression fitting within 4ft.
- Water filtration – lack of proper water filter may void your warranty
 - Test kits available here: [Water Test Kit with \\$15 Filter Credit](#)

POWER:

- Power outlet matching the electrical requirement on the spec sheet for your specific piece of equipment

DRAIN:

- Access to a floor drain or other gravity drain within 4 feet of equipment

COUNTER:

- Proper weight-supporting countertop with appropriately sized hole (3" minimum Diameter) for routing cables and hoses

I, the customer, understand that these requirements must be present when the installer arrives. Failure to have the site ready will result in a \$300 false start fee and rescheduling will be subject to availability.
